

# Vision Preschool Network

The first Vision schools were created in 1995 in the province of Quebec, Canada to address the lack of English immersion establishments for French preschool and elementary school children. Today, more than 3000 children attend the 23 Vision establishments in Quebec.

## Who We Are

With a combined experience of more than 25 years in the field of immersion education, the founders of the Vision Preschool Network have sought to meet a growing need to provide quality educational services in immersion contexts to the international community.

In September 2016, the first Vision Preschool establishment opened in Rabat, Morocco. After only two years of existence, the establishment is at full capacity and welcomed its first Grade 1 students in September 2018. Vision Preschool Dakar (Senegal) and Vision Preschool Kyiv (Ukraine) also opened in September and October 2018, respectively. Talks are currently underway with potential partners for further openings in the upcoming months.

## What Sets Us Apart

### Early Immersion

The Vision Preschool Network recognizes that “the sooner, the better” applies when it comes to learning a new language. The Vision approach to teaching languages is inspired by the most effective model for learning a language at a young age, which is the natural process used to develop our mother tongue. By “living” the new language on a daily basis, young children will progress at an unparalleled pace and will develop skills on which they will be able to rely on in the future.

### Psychomotor Development

Psychomotor activities stimulate the development of habits considered essential for school learning. It's important to stimulate and develop all children's interest in the regular practice of physical activities. Through its expertise in psychomotor development, the Vision Preschool Network offers young children the opportunity to practice, in dynamic and age-appropriate environments, a variety of high-quality motor and psychomotor activities.

### Early Literacy

To ensure their success in elementary school, young children need to feel competent as readers and writers. The Vision Preschool Network believes in the importance of early literacy and its benefits to the overall development of young children. In order to optimize the development of early literacy, the Vision Preschool Network builds on the fact that children are interested in the different writings that are a part of their surroundings, well before they enter school. In addition to making them appreciate the importance of writing, the activities proposed to young children will enable them to build invaluable school fundamentals.

## Learn While Having Fun!

Vision Preschool Network firmly believes that PLAY should be the preferred mode of learning in preschool and that it should be considered as a real educational tool, because “when playing, the child learns the world” – Quebec Ministry of Education, 1981.

Play pedagogy is therefore very much in line with the educational philosophy of the Vision Preschool Network, as it gives a taste for learning while promoting motivation and success. Once again, the Vision Preschool Network stands out from other childcare services by recognizing the two components of the play pedagogy that are considered essential in the day-to-day planning of preschool activities:

There is no doubt that Vision Preschool establishments provide an opportunity for children to be one step ahead!

### Thematic Activities

Long term “missions” in which the children explore, experiment and discover.

### Play 5 Workshops

The most effective educational structure for free play.

## Our Preschools Around the World
